

BDMF Project

HIVE Uganda is running beekeeping that promote access to beekeeping imputes to Youth, Women and people with disabilities.

This involve making of harvesting suits, bee smokers, improve bee hives and hive tools under BDMF.

Both men and women are engaged in making bee smokers and marketing it to the community and also making it accessible to the blind community.

Women are engaged in making harvesting suits and supplying them to blind beekeepers and other community members and since 2019 to 2020 over 250 rural community were served. More than 150 of them are blind or have visual impairment. It is our hope to promote inclusive beekeeping for the blind community.

Some photos

Front view of HIVE Uganda wooden workshop started operation in last week of June 2020 with support from BDMF Fund.

Electrical wiring in the workshop and it is three phase electricity for industrial work.

Wood combine machine with support from BDMF

Timbers being put to sizzle (dry) for making Kenyan Top Bar hives and European bee hives with support from BDMF

Secular saw machine for HIVE Uganda wood workshop with support from BDMF

Staff discussing how to operate the two machines with support from BDMF funds

Work in progress, timbers being feed to the machine for thicknesses

Trainer setting tailoring machines for training.

Trainer supervising the women on bee suit making.

Women at work measuring materials to be cut

Women at work joining the bee suits and vail.

More materials being cut to make more suits

Members Receiving new harvesting suit they from HIVE Uganda

Members using bee suit produced by HIVE Uganda in their hives.

More bee suits and gloves supplied to farmers group.

HIVE Uganda putting security seal using heat gun acquired

Making smokers in progress both men and women participated.

Honey, wax and propolis on sale
